USGBC LIVE — Submission Guide

On June 8-10, 2021, the U.S. Green Building Council will host USGBC Live, a new community-focused digital experience featuring powerful keynotes, interesting sessions, trending content and engagement.

This timely program experience specifically seeks USGBC community stories, case studies and sessions tailored to the virtual audience. Enter your proposal to be considered for inclusion in USGBC Live. This guide details all required information you’ll need to successfully submit your proposal.

HOW TO SUBMIT A PROPOSAL

All proposals must be submitted online here. You may begin the process and return to your saved proposal any time prior to the deadline. Emailed proposals will not be accepted.

To be considered, proposals must ensure each presenter has provided all required personal details and acknowledged their individual acceptance of our program policies, by Monday, April 12, 2021 at 11:59 p.m. EDT (GMT/UTC -4h). All presenters will be contacted independently to confirm their submittal. Please contact program@usgbc.org if you have any questions.

IMPORTANT PROCESS NOTES

Each presenter and moderator will need to log in individually to enter their personal details and confirm their participation in the proposal. The submitter cannot complete the proposal without the acceptance of all proposed participants.

The submittal site will time-out due to inactivity – please save your submission frequently to ensure you do not lose any progress. You must submit a complete proposal before the April 12 deadline.
Submission Process Overview
Please review the USGBC Live Call for Proposals before beginning the submittal process.

Task Four: Learning Objectives

Please enter four learning objectives. A learning objective is an explicit statement that clearly expresses what the participant will learn or be able to do after attending the session. It is an observable and measurable outcome statement that attendees should be able to exhibit following instruction.

Learning objectives are used to qualify presentations for continuing education approval. General CE hours require at least three out of four of the learning objectives relate directly to green building, which includes environmental sustainability, and human health and wellness in the built environment.

Rating system-specific sessions are primarily focused on teaching attendees the various rating systems. If you want to deliver a rating system-specific session the rating system and version must be stated in the description and at least one learning objective.

Example of a rating-system specific learning objective: *Compare and contrast the different soil requirements in Option 1 of the LEED v4 BD+C Site Development – protect or restore habitat credit.*
